Board structure

Virgin fibre 90% of total board (+/-5%)
 Pigment coating 10% of total board (+/-5%)

¹Permissible: -15% of the target stiffness. This applies to 100% of all measured single values. The single value is a calculated average of five measurements per sheet. The stiffness has to be measured at both sides. The resulting average value is then the stiffness of the single sample. L&W 5° figures are binding, Taber figures are indicative. All figures mentioned above may be subject to technical changes.

Excellent Top Pure - the safe, sustainable food service cartonboard - is approved for direct contact with dry, moist and fatty foods on the front and back. Excellent Top Pure has a smooth cartonboard surface that allows the cartonboard to be "thermoformed" into round packaging, for example. Furthermore, the cartonboard can also be used for baked goods up to 250°C for up to 30 minutes, and in the microwave for a maximum of 5 minutes at 800 watts.

Made from virgin fibres from the Black Forest.

[General Terms of Trade](#)

This is a general recommendation. The cardboard should be checked for suitability before use.

Features

- no OBAs (Optical Brightening Agents) added
- approved for direct contact with dry, moist and greasy food on top and reverse sides
- high flexibility and formability
- German quality
- 100 % recyclable and biodegradable
- meets the requirements of BfR recommendation XXXVI/2 for oven applications up to 250°C for 30 minutes as well as microwave applications, with a time value of 5 minutes maximum at 800 watts

Applications

- Dry Food
- Chilled Food (secondary packaging)
- Frozen Food
- Food Service
- Fruit and Vegetable

Mill Information

- benchmark for service and constant quality
- specialised in cartonboard qualities for challenging applications
- experienced, innovative production team and professional technical support
